

READING'S TROUBLES

And a Growing Scarcity of Money Unfavorably Affect Prices.

GOLD ENGAGEMENTS ALSO FELT

Western Union, the Coalers and Grangers Lead the Weakness

AND ALL THE INDUSTRIALS FOLLOW

NEW YORK, Sept. 12.—The stock market today was affected somewhat by the threatened defection among the Reading employes, as well as by the growing scarcity of money, and the trading was throughout almost entirely professional. The government crop report was rather negative in its effects, there being little in it to make a change in the view of anyone on the immediate tendency of prices. The actual engagement of over \$300,000 gold for export to-morrow's steamers was also an element in making the drooping tone during the forenoon, but it felt that at any time good news in regard to the cholera, gold exports or the threatened labor troubles would induce a sharp rally over the list. The industrialists still occupied a prominent position in the market, but except in Districts where the government was unimportant and under the circumstances Reading being the one active stock on the list. The weakest points in the market was Western Union which is suffering the reaction natural after a marked rise. The late decline took in every district of prominence in the market, which only sugar showed any strength—the market was still dull and while partaking of the temper of the leaders showed no more change than the rest.

The final losses were considerable in the active shares and were remarkably uniform, ranging from 1 to 1 1/2 per cent. The industrial leading. Railroad bonds were dull and featureless. Government bonds were dull and steady. Close of the list.

STOCKS OPEN FIRM

But Some of the Leaders Symptomatic With Eastern Weakness.

PHILADELPHIA AND ELECTRIC DOWN

And Union Switch and Signal Losses Come of Its Gain.

AIRBRAKE AND DUQUESNE BOUJANT

Weakness prevailed in the East today because of the low bank reserves, comparatively close money, the presumption that a strike on the Reading system was imminent and the shadow of the cholera.

The leading feature in Wall street extended to other districts to a certain extent and to find something of a reaction here, particularly in the shares of the local list which have a market in New York and Boston. The report of a case of cholera in Jeannette came too late to have any effect on 'Change, and it is well it did, for it was subsequently shown by a Jeannette physician who made a thorough examination to have been without foundation. Good authorities do not believe cholera will secure a foothold in this country this year, and they do not believe the scare, or the other factors now prominent, will seriously interfere with general trade. "The volume of business in progress," says one, "is large and its character sound and singularly free from speculative risks. Current conditions are well adapted to the requirements of the country, and there is no fear of disturbance on this account. The crop situation, although indicating a general falling of prices, is not unfavorable, and there is no means unfavorable, and there is abundant evidence of the prosperity of the country, covering the entire field of production of the country. The manufacturing situation, showing increased activity in woods, covering the entire field of production of iron and of staple products, reflects a more substantial and prosperous condition of the country. A calm survey of the situation affords ample evidence that its unfavorable features, including the cholera scare, and the continued gold exports, the unfortunate conditions prevailing throughout so great a part of Europe, and the uncertainty of the Presidential campaign, offer no conditions that justify the expectation of a season of unusual business and prosperity.
